

DellHost keyword summary, average amount of hits last month, and recommendation options for use in your search engine campaign.

These are averages for the searches corresponding to the keywords/phrases underlined in bold for all of the major search engines/pay-per-click engines, and directories last month.

The major keywords reported, are an average from the following engines/directories of the month of August 2001: Yahoo, Google, MSN, AOL, AltaVista, Go Network, Lycos, Excite

The above engines/directories represent 84.49% of the total search engine queries per day, or approximately 269 out of 319 million.

Please be aware that this is not the actual number of people who will visit your site.

This would be impossible to determine as it depends on factors such as whether your title, description, are intriguing enough, and how close your site matches what people are looking for.

Legend:

of hits **These are keywords/phrases that we did research on, and then a listing of relevant suggestions that a customer might want to also choose to advertise.**

affordable web hosting (These are the words the customer wanted Research for underlined)
